59,901 given a second dose by the end of 5 June 2022.
52,300 given a booster/third dose by the end of 5 June 2022.

Vaccination programme continues across Derbyshire - A message from Joined Up Care Derbyshire

A reminder that as part of our ongoing vaccination programme, the mobile vaccination service is still in full swing and up to now has visited various different communities in Derby and Derbyshire to provide an opportunity for those who have not yet managed to get their vaccine to come along and talk through any concerns they may have and to receive their life-saving vaccine. The service has been successful in reaching those communities who may find it difficult to attend a larger vaccine clinic and we are now beginning to roll out clinics for children aged 5-11 to support families to get their children vaccinated.

Keep up to date on the vaccination programme and where the mobile service is visiting in the coming weeks by visiting the [Joined Up Care Derbyshire website](#).

- **Healthcare in Chesterfield Royal Hospital NHS Foundation Trust**

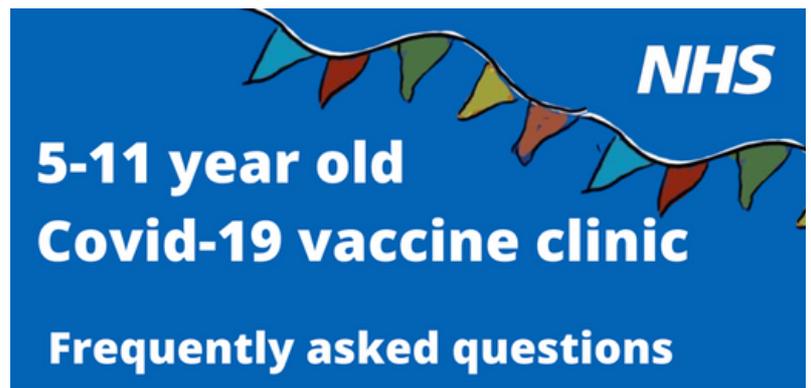

Between 23 May 2022 and 29 May 2022, 17 went into hospital with coronavirus. This shows a decrease of -22.7% compared to the previous 7 days.

There were 12 patients in hospital with coronavirus on 31 May 2022

- **Deaths in Derbyshire Dales**

Between 26 May 2022 and 1 June 2022, there has been 1 death within 28 days of a positive coronavirus test.

Key statistics from the UK Coronavirus (COVID-19) Dashboard - last updated on Monday, 06 June 2022.

By the time they leave school, a child will typically have been offered vaccinations against 18 different diseases or infections - the Covid-19 vaccine is one more vaccine that children can have to protect them from illness.

My child is healthy. What are the benefits of them having the Covid-19 vaccine?

As well as protecting children and young people against serious Covid infection, by getting vaccinated, children and young people can reduce the risk of passing on the infection to others in their family and anyone else they come into contact with.

I want to get my child vaccinated at this site - what is the consent process?

Parents, carers or those with parental responsibilities should attend Covid-19 vaccination appointments with their child. Unlike vaccinations in schools, consent is collected on the day, so this is the best way to make sure they can be vaccinated by going through questions together on site.

Which vaccine will my child be given and how many doses will they need?

Children with no other underlying health conditions will be offered two paediatric (child) doses of the vaccine, with at least 12 weeks between doses. A paediatric dose is smaller than the doses given to those aged 12 and over.

My child has already had COVID-19 and has built up natural immunity. Why do they still need the vaccine?

The COVID-19 vaccine should give your child stronger protection than natural immunity from previous infection against serious complications of infection - including any future waves due to new variants. Your child should also have some protection from the mild symptoms, and vaccination lowers the risk they will pass the virus on to others around them.

YOUR HEALTH & WELLBEING - INFORMATION

Dementia Pre-diagnosis Support:

Alzheimer's Society have recently launched a pilot in Derbyshire to reach more people with the symptoms of Dementia before they receive a diagnosis. The service can provide a range of preventative support, advice and signposting to help people to plan for their future. Research suggests there are many people living in Derbyshire who have the symptoms of dementia but no diagnosis and they would benefit from earlier support whilst waiting for a diagnosis.

Are You Worried About Your Memory?

Are you experiencing memory loss, having problems with things like organising, thinking clearly, concentrating, or communicating or experiencing visual difficulties?

If the answer is yes, your first port of call is to see your GP.

To help inform you about the range of support you can access from the New Pre-Diagnostic Support Service please contact: 01332 208845 & ask for the Pre-Diagnostic Support Service

The Pre-Diagnostic Support Service helps people to:

- Access memory aids
- Identify aids to improve cognitive skills
- Look at a healthier lifestyle
- Know what to expect at a memory assessment appointment
- Assess environmental aspects that may impact on a person life
- Identify 'other' things that may cause memory problems
- Identify other services for support and assisting them to refer
- Access carer information, advice, and navigation to other services for direct support
- Look at their day to day living offering remedies to help them cope and gain a better understanding of what is happening

With the weather getting warmer, many of us will be spending more time outdoors. Ticks & the potential risk of Lyme Disease shouldn't prevent you from enjoying the outdoors, but there are some things you can look out for & do to avoid being bitten - check out this blog for more: <https://ukhsa.blog.gov.uk/.../what-is-lyme-disease-and.../> #BeTickAware #BeLymeAware

We're likely to see high pollen levels this week. Hay fever is usually worse between late March and September, especially when it's warm, humid and windy. This is when the pollen count is at its highest.

If you suffer from hay fever, this means your symptoms may flare up. The NHS page has some useful information on easing your hay fever symptoms... [NHS Hay fever](#)

Calling 111 for Physiotherapy Advice?

Joined Up Care
Derbyshire

We Can... ✓

- Assess and triage you to the most appropriate service;
- Advise you on how to manage your symptoms;
- Explain where to go to get a referral to a Physiotherapist

We Can't... ✗

Get you an appointment with a Physiotherapist - You need a GP or hospital referral for this.

PLEASE RESPECT US... We're #HereToHelpYou

Need some physiotherapy advice?
